System Requirements

WITNESS Horizon is supported on PC systems that meet the following minimum requirements:

- **Processor**: Intel® or AMD® - Processor Speed 2GHz (higher speeds recommended)

- **Supported Windows Versions**: Windows 10, Windows 8.1*, Windows 8, Windows 7 SP1, Windows Vista SP2, Windows Server 2012 R2*, Windows Server 2012, Windows Server 2008 R2 SP1, Windows Server 2008 SP2

- **Memory**: 2GB of RAM (>4GB recommended)

- **Hard Drive**: 1GB of available storage space

- **Screen**: 1024x768 pixel screen resolution (higher resolutions are recommended)

- **Graphics**: Graphics cards compatible with the supported Microsoft Windows Versions. WITNESS Quick3D requires an NVIDIA graphics card. Recommended adapters include NVIDIA GeForce© with at least 2GB of RAM or NVIDIA® Quadro® series. Graphics cards from other providers may be compatible but are not supported by Lanner.

- **USB**:WITNESS can be issued on a USB memory stick or downloaded from the MyLanner Support Portal. A USB socket is required for a hardware 'dongle' based security solution. Other security options are available.

For Windows 8.1 and Windows Server 2012 the following additional prerequisites need to be installed - April 2014 Update (see KB2919355) and Servicing Stack Update (see KB2919442) for both 32 & 64 bit.

Note that WITNESS Horizon will <u>not</u> run on Windows XP.
